TOP PROJECTS

MAY 2015 - **Migrate Buildbot's Web UI to Angular Material**

An accepted project of *Google Summer of Code 2015*

Main goal of this project is to give [Buildbot](#) (a well-known open source build system) a new appearance based on *Material Design* and *AngularJS*.

JULY 2014 - **Mylcons**

Yet another web-based flat icons manager and web font builder

My own open source project developed with *Django*, *AngularJS* and *Fontforge*. It earns more than **360 stars** on GitHub. <http://io-meter.com/myicons>

JULY 2013 - JAN 2014 **CODE**

A GitHub like platform in python

Main work of my internship at Douban. I introduced an email templating system and many other improvements to the project. <http://douban-code.github.io>

MAR 2011 - JULY 2013 **diumoo**

A native Mac client for DOUBAN FM

This music app has more than 100,000 downloads and is highly evaluated in *Mac App Store*. <http://diumoo.net>
