## TOP PROJECTS

---

MAY 2015 - **Migrate Buildbot's Web UI to Angular Material**  
An accepted project of *Google Summer of Code 2015*  
In this project I developed a brand new web interface for [Buildbot](#) based on *Material Design* and *AngularJS*. The work concerns about designing and coding of all pages such as *Dashboard*, *Builders* and *Settings*. This project passed the final evaluation and has been accepted by the community.

JULY 2014 - **Mylcons**  
Yet another web-based flat icons manager and web font builder  
This is a independent project of mine that is developed with *Django*, *AngularJS* and *Fontforge*. This web app is easy to deploy and enables users to upload, organize and build new icon fonts with revisions history and rollback function. It earns more than **360 stars** on GitHub. <http://io-meter.com/myicons>

JULY 2013 - JAN 2014 **CODE**  
A GitHub like platform in python  
Main work of my internship at Douban. I introduced an email templating system and many other improvements to the project. <http://douban-code.github.io>

MAR 2011 - JULY 2013 **diumoo**  
A native Mac client for DOUBAN FM  
This music app is my independent project. It provides some unique functions such as *Time Machine* and is highly evaluated in *Mac App Store*. It has had more than 100,000 downloads by now. <http://diumoo.net>

## EDUCATION

---

SEPT 2013 - MAR 2016 (EXPECTED) Master's Degree in COMPUTER SCIENCE  
*Computer Science Dept., SEIEE, Shanghai Jiao Tong University*  
JAN 2009 - JULY 2013 Undergraduate in MATHEMATICS  
*Science College, Xidian University, Xi'an, Shaanxi*

## OTHER EXPERIENCE

---
